

Residential, commercial and industrial buildings benefit with our systems

Simple construction and time efficiency

- Our walls are erected in hours instead of days
- Wiring is a snap with pre-channeled panels

Cost savings:

- Faster construction times
- Substantially less waste
- Lower energy bills
- Lower fascia expenses
- Tax incentives and rebates

CREATE A HEALTHY ENVIRONMENT!

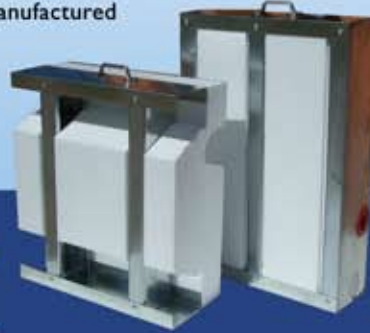

"This is the highest indoor air quality of an occupied home that I have ever tested."

Derek Longstaff, CIAQP
EPA Certified Lead Inspector
Certified Environment Services Inc.
Phoenix, Arizona

Build Green for Efficiency and Marketability

By "Building Green" the structure must be energy efficient, recyclable and create a healthy environment. Whether investing in a home or a commercial building, buyers demand advanced technologies. All of our systems are engineered and manufactured to the highest industry standards.

We can bring tomorrow's technology to your project **TODAY**

Applications

Residential
Commercial
Industrial
Home Additions
Fences
